

## Solar Cell Laser Scribing

### Solar Cell Laser Scribing

- Laser: Fiber 1064um, 20 watt
- Working distance: 358mm
- Scribing depth: 80~100um (total wafer thickness: 180~200um)
- Scribing time: 2 sec (repeat path: 10times)
- Vision check for fiducial mark & align
- Solar cell stack to stack magazine design
